ARABIAN COMPANY

Few can match the prowess of Arabian Company in the field of Office Furniture. Growing in strength in this business for over five decades. Arabian Company has helped some of the country's leading institutions redefine their interiors through its sourcing and fit-out of office furniture and space

FLOORS & MORE

Our flooring and wall finishing solutions are all provided by Floors & More, a leader in its field of expertise. Leading American, European, and Asian Brands such as EGE Carpet, CBI Raised Flooring, Newmore and Murek Wall Covering, and Alkins Roller Blinds are among those that have chosen Floors & More as their partner of choice

THE AB WOOD INDUSTRIES

A part of Arabian Group of Companies is a pioneer in the field of custom-made furniture manufacturing and designing of optimum quality, with more than 40 years of expertise

SMART DIMENSIONS

So deep is our insight into detail that we have a sister firm that is dedicated to the field of partitioning systems and acoustic solutions. From supplying to installation, SMART Dimensions is a leader in all types of partitioning systems ranging from demountable partitions to wooden and metallic ones and acoustic materials and finishes.

TAKHZEEN

A complete provider, importer and stockiest of Smart Storage and Filling System Department (SS&FS Dept.), TAKHZEEN offers vast experience in the field of maximizing space both vertically as well as horizontally. This is your one-stop shop for all things storage ranging from HanelRotomat system to Electrical and Mechanical Mobile shelving.

ARCO INTERIORS

ARCO Interiors L.L.C. is a specialist in interior solutions providing Fullscope turnkey interior design, fit out and furnishings. We are highly regarded for our ability to deliver cost effective, time efficient and high quality projects. Our close-knit team of designers, architects and engineers are able to translate client ideas into successful projects that work both aesthetically and commercially.

ARCOINTERIORS CONSULTANCY

Our In-house Interior Design Consultancy. We develop a vision for each project through a carefully evolved process in which we assess the client needs and provide appropriate Designs. Our passion for what we do is reflected by our relentless energy, service, and quality and advocacy fo1 our clients. We consistently deliver interior design concepts that echo the desires of our clients and enhances their lifestyle and business environment in harmony with nature.

ARCO ELECTROMECHANICAL

Our very own in-house provider of electrical, mechanical and plumbing solutions. We offer an astounding level of experience in the field of MEP works. The firm is made up of highly professional engineers who ensure that all the unseen critical aspects of an interior fit-out are functioning smoothly at all times.

ABSONS IT

Absons IT Solutions & Equipment LLC is the technology arm of the Arabian Company investing in valued trust of our customers by providing right IT technology solution th rough professional network of international and local providers that present the experience in the innovative applications of technology to meet the customer requirements.

SICURO

SICURO does Security at its best with a local twist. We simply have the world's most renowned Security Solution brands coupled with a professional team of experts that have a solid understanding of the region, from a technical, legal compliance as well as cultural perspective.

AGH

المجموعة العربية القابضة ذ.م.م
ARABIAN GROUP HOLDING LLC

BARADI

A leading manufacturer specializing in all types of high quality window treatments ranging from manual to motorized curtains and blinds and other treatments that suit the needs of our clients. High Quality Products coupled with the expertise of highly creative designers, a strong production unit and highly professional installers turn dream projects into functional realities.

ARCO EDU & LABS

When it comes to importing and stocking quality material for home, office, education and laboratories, few UAE companies can match the lavish variety of furniture and allied equipment offered by Arco Edu & Labs. Furniture apart, this firm's strength also lies in a special range of electrical and mobile filling storage systems.

PLAY SPACE

Play Space is an established market leader in provision of outdoor and indoor playgrounds equipment, Inflatables, Schools and nurseries furniture, Garden furniture, and Safety flooring. Play Space's main customer markets are municipalities, Landscaping contractors, schools and nurseries, hotels and all other private and government parks.

MMEC **MANNESMANN**

NMEC MANNESMANN

MMEC Mannesmann (MMEC) is an independent EPC CONTRACTOR offering to its customers the full chain of services starting at early study and feasibility project phases up to the project implementation phases on a collaborative basis with our customers, partners and suppliers, we build long term trustful relationships and implement projects in a broad portfolio.

ULTRACARE MEDICAL CENTER

At UltraCare Medical Center we offer a range of cosmetic treatments. These include laser hair removal, dentistry, weight control, Dermatology and skin care. All treatments are done by and under the supervision of our highly skilled doctors. We focus on giving our patients quality medical services, compassionate care, and state-of-the-art technology.

ABSONS GENERAL CONTRACTING

An integral and complementary part of the Arabian Group. It is a fully fledged general contracting firm actively working in the market and delivering well engineered and firmly constructed buildings and structures within the United Arab Emirates.

KAWADER HR CONSULTANCY

Kawader is a premier recruitment Consultancy based in UAE. It offers a hawks-on quality service that allows us to source and work with candidates from a wide range of countries. Kawader provides executive search, overseas recruitment and contract staffing Services for contingencies as well as for turnkey projects and covers the following sectors: Aviation, Banking, Call Center, Construction, Engineering, Hospitality, Healthcare, IT, Media, Office Support also Facilities Management Services.

ARCO OIL AND GAS SERVICES

ARCO Oil & Gas Services managed to become pioneer in supplying specialized products and services along with its principal companies to the Oil, Gas, Power Generation Industries, Water and Energy Sectors, Chemical and Petrochemical Industries, Oil and Gas producers, Drilling Contractors, EPC Contractors, Government and Semi-Government companies and private sector companies in the UAE

Designing for Sustainability
 We work towards better futures for the planet by designing and manufacturing products that respect our natural world, while helping to restore its resources. To do this we: reduce our carbon footprint, design for circularity and choose and use materials responsibly.

Solutions that bring the workplace to life.

Steelcase is a global design and thought leader in the world of work. Along with our expansive community of brands, we design and manufacture innovative furnishings and solutions to help people do their best work in the many places where work happens.

People + Planet
 We believe that doing our best work for the places we all share starts with designing better futures for the wellbeing of people and the planet. We're doing better for people by building community and belonging where everyone feels seen, heard and valued. We're doing better for the planet by transforming our business and committing to a net-zero future to build a more sustainable and resilient world. Because when we do better, we help the world work better.

Steelcase HEALTH Steelcase LEARNING AMQ coalesse

DESIGNTEX HALCON orangebox Smith System viccarbe

Designed to support clinicians in action, Sync workstations facilitate collaboration between colleagues, connection to patients and access to the technologies and information vital to quality care.

A Place to Connect
The Opus overbed table is central to activity and interactions in the patient room. Alongside a bed or recliner, it provides a convenient, adaptable surface for meals and tasks in combination with a surface for clinician use.

Adjustable and easy to move, it serves both sides of the bed and helps give patients a sense of boundary and control over personal belongings. At the same time, it acts as a social bridge where patients, clinicians and family can gather and share.

About Steelcase Learning

At Steelcase Learning, we're passionate about helping to create the conditions for lifelong learning. Our research-based foundations in education and active learning spaces enable us to serve all levels of learning. Working with leading schools and organizations, we measure outcomes and use our Insights to design human-centered solutions and settings that foster greater wellbeing and engagement in learning.

viccarbe

Steelcase

History

Our story is built on people—a passion for learning, creating human and understated products, the sun's influence on our most creative side, constant innovation, engineering, and an unwavering commitment to quality as part of our corporate culture.

Philosophy

Viccarbe is located in Valencia, a marvellous Mediterranean city where we enjoy more than 300 days of sun a year.

We are collaboration

At Steelcase we design and manufacture collaborative design furniture for singular spaces from Valencia to the world.

Steelcase

Why Build Walls

Our ongoing programme of meeting pods, for open-plan environments that are scalable, reconfigurable and movable, with a refined level of acoustic and infrastructure performance.

Away from the Desk

A soft landscape system where low and high back units combine to create work and meeting spaces, which range from collaborative and media working booths to larger, more open-plan configurations.

Frezza was founded in 1954 as a family company with long-standing handicraft tradition. The company initially focused on products for the home but, with time and boldness, production was extended to furnishing elements for the office. In 1974, the company specialized in the production of these elements.

A new path was created, characterized by outstanding results and entrepreneurial challenges aiming at making the products more and more innovative and exclusive.

One of these challenges was the creation of Eurosteel Italia in 1987, a company which specializes in the production of metal semi-manufactured goods; then the acquisition of Casamia brand in 1988 or Emmegi between 1990 and 1991.

In 1992, one of the fundamental changes in the industrial evolution of Frezza took place when the company joined Gruppo Doimo. Under this guidance, the company has confirmed its determination to grow.

The Spike executive desk can be integrated with a side extension equipped with a height-adjustable service top, which allows you to change the height of your workstation in just a few moments using a simple remote control.

Functional and discreet details combine the elegant appearance of the service units with excellent craftsmanship, ensuring absolute stability and maximum legroom. A piece of furniture designed to make it easier for people to work.

Social awareness and environmental responsibility are among the fundamental objectives of Frezza's company philosophy. The quality of Frezza's production and production processes for each single product has been guaranteed for years by international certificates and awards. The attention and the devotion required for these awards clearly show how much the company cares for its surrounding territory and witness its deep connection to it.

The modern design of the Ono executive desk is characterised by the robustness and elegance of the aluminium structure combined with quality materials such as wood and leather.

The significant dimensions, with worktops up to 240 cm, make it a symbol of leadership. A thin wooden top rests on a sturdy frame hidden by an aluminium perimetrical frame. The particular aesthetic recess of the desk profile makes it easier to place the seat with armrests next to the worktop. The sliding top is the right solution to keep the work surface in order and be connected at the same time. The opening of the top allows access to the electrical sockets located in the wiring tray below. The opening mechanism is

The Pop Easy collection represents the essence of the operative office and stands out for its essential lines. The flexibility and functionality that define it make it the ideal choice for your working environment.

The metal bridge leg, made with a single square section steel tube (45 mm x 45 mm), is available in white, aluminium and black finishes. The brackets and supports create a 5 mm space between the leg and the work surface, giving a visual sensation of a suspended top.

Intelligently designed, the desks and tables can be easily configured according to the needs of each user.

The Stand By collection was born to give an answer to the changes in human relationships and work approaches.

Stand By is a social collection, designed by the design studio Favaretto & Partners in which the combination of styles with modern and rigorous design has led to a complete series of tables, shelves, sofas, pods and accessories for the office of the

Social awareness and environmental responsibility are among the fundamental objectives of Frezza's company philosophy. The quality of Frezza's production and production processes for each single product has been guaranteed for years by international certificates and awards. The attention and the devotion required for these awards clearly show how much the company cares for its surrounding territory and witness its deep connection to it.

Designed to provide an effective response to the needs of privacy and concentration in open space environments where high levels of soundproofing are essential, the Stand by Limbo pod stands out for the highly technical and aesthetic characteristics that place it at the top of its category.

The self-supporting perimeter is composed by a series of steel panels, subsequently filled with

DV913-Vigo is an executive furnishing collection designed to give a strong and distinctive personality to the office space, a professional habitat characterized by technology and comfort, flexible and open to common areas. In the concept of executive office that the DV913-Vigo project tells, the table is a work of architecture on a reduced scale, a meticulous design element in which the important thickness characterizes the sides and the robust worktops. The structures of the tables highlight the composition between the supporting leg and the aluminum frame. The sculptural contrast of weights and volumes fully identifies the spirit of the Vigo collection.

In particular, the equipped console of the DV910-Oxford line stands out for its multi-functionality and for the variety of uses it offers: in the office or at home, as a practical area for work or study. The console consists of a worktop with cable channel, a drawer available in two widths, a closet area with sliding doors and clothes hanger. The arrangement of the individual elements can be changed according to the needs. Oxford is mainly made of 38 mm thick melamine panels and is available in different colors and finishes.

DV910-Oxford is an executive collection composed of a wide range of furnishing elements able to meet the most varied design requirements. Desks, service units, peninsula desks, integrated modules, meeting tables and multifunctional consoles are characterized by the same aesthetic sign: simple geometries, based on essential lines and shapes, intersect each other and create a highly elegant ensemble. The minimalist effect is dissolved and at the same time enhanced by the combination of different finishes, in particular by the leather-effect inserts, available in three colors, which further emphasize the geometric character of the compositions.

sophisticated love seats and enveloping armchairs embellished with generously-sized tables are the protagonists of the living area. The products, born of different international inspirations, are part of a coordinated and coherent style project.

Forma 5

From Forma 5 and with the collaboration of Ito Design we have developed 3.60, a task chair that accompanies the natural movement of the body and the user is required to maintain stability by increasing the use of muscles and knees. The 3.60 task chair has been designed from the study of ergonomics, physiognomy and kinematics of the human body and, in particular, the postural development in the office throughout the working day.

This important innovation has been investigated in a Biomechanical Analysis Health Centre and it has been certified, with a scientific basis, that it provides greater comfort and is healthier for users.

From Forma 5 and with the collaboration of Ito Design we have developed 3.60, a task chair that accompanies the natural movement of the body and the user is required to maintain stability by increasing the use of muscles and knees. The 3.60 task chair has been designed from the study of ergonomics, physiognomy and kinematics of the human body and, in particular, the postural development in the office throughout the working day.

From Forma 5 and with the collaboration of Ito Design we have developed 3.60, a task chair that accompanies the natural movement of the body and the user is required to maintain stability by increasing the use of muscles and knees. the postural development in the office throughout the working day.

Let's Meet enables both formal and informal meetings between team members, allowing the office space to be converted into useful, productive workspace.

The Company "i 4 MARIANI" is so called because of the 4 brothers Biagio, Tarcisio, Umberto and Emilio that established it on 1957; it is really a family operated company. Now, with the third generation coming soon, each member of the family contributes their own particular competence to provide a role in a well tested mechanism.

The 4 founding fathers - all still active in the Company - ...

The historic company of Mariano Comense told the new trends of Home Design with a new housing concept set up at the Rho Fair spaces. The exhibition space, created in collaboration with Architect Umberto Asnago and Architect Altea Prati for finishes and fabrics, aimed to represent i 4 Mariani and its values, becoming the expression of the solid know-how that distinguishes the made in Italy production of the company specialized for over 60 years, in the realization of unique Italian style and keeping up with the trends of contemporary luxury.

A piece of furniture that declares its character at first sight. It is Master, a conference table that, as the architect Asnago explains, "stands out for its asymmetrical shape which clearly indicates the position of command at the end parts". Characterized by an outer edge in grey stained solid black walnut wood and a top that alternates a saddle leather part with a central part in wood, in the base combines leather doors and fixed elements in solid grey black walnut wood. Many details make Master a

The collection is composed by elements that can be both convexes and concaves. All these elements can freely be assembled obtaining from the more standard compositions to the strangest ones; obviously they can be used also with all the elements of the standard linear add_look collection giving free play to everyone's imagination.

The frame of the relax armchair is composed by two pieces of beech plywood panel curved into a mould, one for the back and one for the seat, fixed together through a solid beech wood part and two metal sheets.

The cushion of the back is a piece of polyurethane cold formed into a mould glued to a thin plywood panel that is fixed to the frame of the back. The seat cushion is made in polyurethane foam covered in polyester wadding. The ottoman is made in beech plywood panel with a polyurethane cushion covered in polyester wadding.

Both the armchair and the ottoman have a round

Basically with Add_Look round we made a new invention: how to hoop the square.

Soft seating

Healthy office

Nowadays, many professions require people to work in offices, sitting at desks in front of computers. In this respect ergonomics has an important task to fulfill. The screen that we daily stare at, the computer mouse under hand and above all the chair on which we sit long hours ... Each element of our surroundings should be designed and adapted to the unique physical features and needs of an individual. This applies especially to the unique parameters of the human body and mind. All this needs to be done to reduce the burden of sitting at the desk for many hours and ensure that an 8-hour working day is creative and effective.

Ergonomics lays the foundations for the creation of an optimum working environment, to tailor it to the physical and mental capabilities of people to the greatest extent and to minimise its impact on health. Ergonomics aims to ensure not only a safe and healthy work place, but also a comfortable one.

The most important element of the Quality Management System is customer orientation, meaning the identification of his/her needs and requirements and their best fulfillment. In our activity we employ the strategy of sustainable development. To ensure the attainment of the established goals in that respect we have implemented the Environmental Management System which enables us to tackle the issue of ecology in a comprehensive manner.

NARBUTAS

Together with the design studio Yonoh, Sancal presents a unique program of occasional tables and seating solutions. Clara and Alex are both from Valencia, a Spanish city renowned for its ceramic tiles, so it seems only fitting that this provided the inspiration for the piece.

Mosaico is a puzzle that can be used to solve a range of different spatial constraints. The bases are made of ash and are available in five measurements upon which marble or wooden tops can be fitted as well as upholstered seat cushions. The optional backs enable the pieces to be transformed into mini-sofas. The hexagonal piece enables, amongst other possibilities, the creation of compositions that make closed

Together with the design studio Yonoh, Sancal presents a unique program of occasional tables and seating solutions. Clara and Alex are both from Valencia, a Spanish city renowned for its ceramic tiles, so it seems only fitting that this provided the inspiration for the piece.

Mosaico is a puzzle that can be used to solve a range of different spatial constraints. The bases are made of ash and are available in five measurements upon which marble or wooden tops can be fitted as well as upholstered seat cushions. The optional backs enable the pieces to be transformed into mini-sofas. The hexagonal piece enables, amongst other possibilities, the creation of compositions that make closed loops. The corner angle adds an element of sinuosity to the design with its curved side.

The wood chosen for the collection is ash, due to its texture and grain. A wide array of stains is available: from natural shades to vibrant colours like pink or yellow. The raised seams help to define the curved lines of the piece.

Clara and Alex have defied the tenets of box-like shapes being used for public areas by using softer forms. Yet, despite its hefty appearance, Sumo has a small footprint (178cm and 92cm for the sofa and armchair respectively).

Our Local Manufacturer Tweet Desks

This managerial-level desk is expertly customized by ARABIAN COMPANY LLC to meet the modern office's demands. Crafted with a durable melamine finish, it offers a clean, contemporary look that complements executive spaces. The desk features a spacious credenza return, providing ample surface area and storage for daily essentials, documents, and devices. Its sleek V-shaped metal legs not only add a modern architectural flair but also ensure robust structural support and stability.

Our Local Manufacturer Desks

UBRAN FASHION

Fashion, simplicity and vitality
Office furniture manufacturing technology is the display of aesthetic concepts and boundless creativity.
Therefore, the practicality of office furniture is not something the designer wants to emphasize at this time.
The presentation of sophistication and artistry is the focus, which reflects a strong and relaxed artistic language.

The simple combination

with the collective space of work, Generous decent appearance, so that limited space is full of boundless passion, The total portfolio of economic and practical, tangible benefits in the same time satisfied different needs with satisfied answer.

A Vision of Comfort and Style

Acuity is a task chair that enhances any environment and any body. Our objective was to build an ergonomically correct chair to instantly and comfortably fit every user regardless of body type. In essence, a chair that adapts to you, not the other way around.

Our Local Manufacturer Tweet Workstations

Our Local Manufacturer Adjustable Workstations

At Imm 2019, the international design fair staged in Cologne, from the 14th to the 20th of January, Ditre Italia presents the exhibition stand project signed by the architect Daniele Lo Scalzo Moscheri, art director of the company. The aesthetics of the stand is emphasized in the elegance of the materials that define it and the way in which they are brought together.

In a flexible compositional scheme, Ditre Italia's experience of living welcomes the company's collections, offering a real usability of each piece, in a free path that allows visitors to satisfy personal needs and curiosity. The projects, signed by designers on the international scene, find space in a series of upholstered and complementary furniture presented as real Ditre Italia total look.

FLOORS & MORE

Steel Cementitious raised access floor

Floors and More Provide Full steel combination Framework with strong intension, high Size precision and good interchangeability. Fireproofing, waterproof, four sides are fixed Very well to avoid moving of floor with good Walking feel, the mould of outlet interface is Molding, Bing stable performance in humidity Temperature.

Wood Core raised access floor

Floors and More provide the Bare Panels are Modular panels 600 x 600 resting on a suitable Support structure in steel available in different Measurements. The core of the panels is made Of wood core, fully encapsulated in steel, with Single or double alufoil backing, with the tongue & groove interlocking system.

Altro Whiterock Digidclad (Wall)

With Altro Whiterock Digidclad, you can produce high quality, life-like images that include all the hygienic and functional attributes of Altro Whiterock. With vector artwork, these images can span multiple panels or could be used singularly as a design element. The choice is yours and the design opportunities are endless

Altro Tierra (Static-conductive flooring)

Altro Tierra is a static-conductive, flexible vinyl flooring system with permanent anti-static properties*. It gives the highest level of protection against Electro Static Discharge (ESD), when conductive footwear is worn.

Carpet Tiles

Carpet tiles, also known as carpet squares or Modular carpet, are a modern and stylish for The raised floor spaces. These carpets are most Prominent in the commercial sector. Carpet Tiles comes with quality backing systems as They provide dimensional stability and help Carpet tiles withstand moisture. Carpet tiles Offer freedom of design, allowing you to give More depth and texture to a room.

Axminster

Floors & More's Axminster carpets are well Known for their designs and elegance. They Are rightly regarded as one of the finest quality Axminster available and are reputed as the Carpet for luxury. Floors & More has Partnered With the world-renowned brand for Axminster Carpet.

Hand Tufted

The process for creating a hand tufted carpets Differs greatly, as it is made by punching strands Of wool into a canvas which is stretched on a Frame. This is accomplished with the help of A hand operated tool. This process is not very Time intensive. After pilling with wool, the carpet Is removed from the frame and a scrim fabric Is glued to the back. To complete the carpet, a Fringe is added by either sewing on or gluing.

Machine Tufted

A machine tufted carpet is a process of creating Carpet on specialized multi - needle sewing Machines, Several hundred needles stitch Hundreds of rows of pile yarn tufts through a Backing fabric called the primary backing.

FLOORS
& MORE

From Study to EPC Implementation

GREEN HYDROGEN

Hydrogen Station
MMEC Mannesmann

Green hydrogen is emerging as a transformative force in the United Arab Emirates (UAE), signaling a commitment to sustainable energy practices. The UAE, a global hub for innovation and development, is actively embracing green hydrogen as a key component of its clean energy strategy

MMEC Mannesmann is pioneering the use of green hydrogen in the UAE with the establishment of the first hydrogen-fueled stations.

This groundbreaking initiative includes a station strategically positioned in **Masdar City**, a hub for renewable energy and sustainable technologies, and another station located in the vibrant city of **Dubai**.

These stations mark a pivotal step towards a more sustainable and environmentally conscious future, showcasing MMEC Mannesmann's commitment to driving innovation and contributing to the UAE's position at the forefront of the green energy transition.
